

# DML

Linguagem de Manipulação de Dados

# INSERT

Inserindo Valores

**INSERT [INTO] tabela[(coluna1, coluna2,...)]**  
**VALUES (valor1,valor2,...)**

FORMA BASE

**INSERT [INTO] tabela**  
**SET coluna1=valor1, coluna2=valor2,...**

VARIAÇÃO

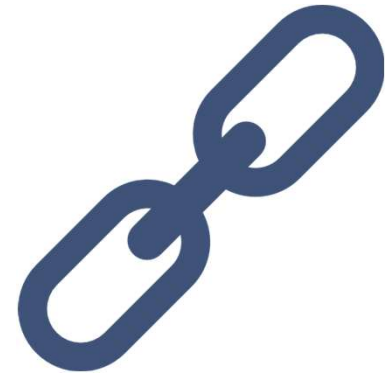

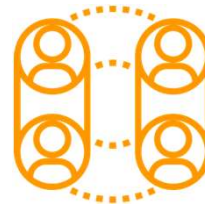

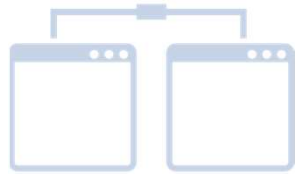

Ex: Inserção

**INSERT INTO**

**empregado(nome,email,salario,setor,funcao)**

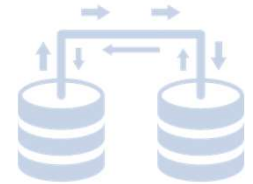

**VALUES**

**('O Silva','silva@live.com',1750,'financeiro','contator')**

# UPDATE

Editando valores

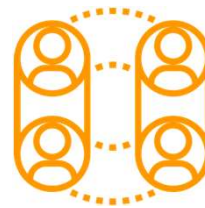

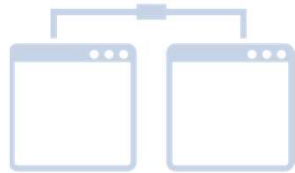

**UPDATE** tabela  
**SET** coluna1=valor1, coluna2=valor2,...  
**WHERE** CONDIÇÃO

FORMA BASE

- 
- Ex: Conferir um aumento salario de 7% para os empregados do setor financeiro

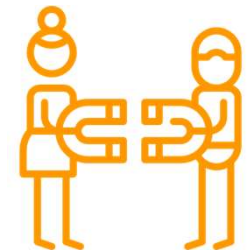

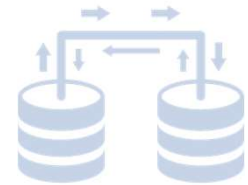

```
UPDATE empregado  
SET salario=1.07*salario  
WHERE setor='financeiro'
```

# DELETE

Deletar valores

**DELETE FROM tabela**  
**WHERE CONDIÇÃO**

FORMA BASE

■ Ex: Deletar o registro com id 5

**DELETE FROM** empregado  
**WHERE id=5**
